DETAILED ACTION

Allowable Subject Matter

Claims 1-26, 44-57 are allowed.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: The prior art does not anticipate nor render obvious the combination set forth in the independent claim and specifically does not show a motion unit that moves the container through the passage along the cooling axis wherein the sample is cooled by conduction from direct contact between the container and the inner surfaces of the plates, wherein the cooling plates maintain direct and tight sliding contact with the flexible container as the flexible container passes through the passage.

The closest prior art Polk US Patent No. 3,074,247 discloses a cooling system using conductive plates for packages and a motion unit that moves the packages through the passage when the plates are no longer in contact with the packages. Although cooling plates are known and utilized for lowering the temperature of objects such as biological samples, there is no teaching in the prior art of record that would be reasonable and absent impermissible hindsight motivate one having ordinary skill in the art to modify the teachings of the prior art to allow the motion unit to move the container through the passage wherein the sample is cooled by conduction from direct contact and the cooling plates maintain direct and tight sliding contact with the container as the container passes through the passage as required by the independent claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
